BIANCA II

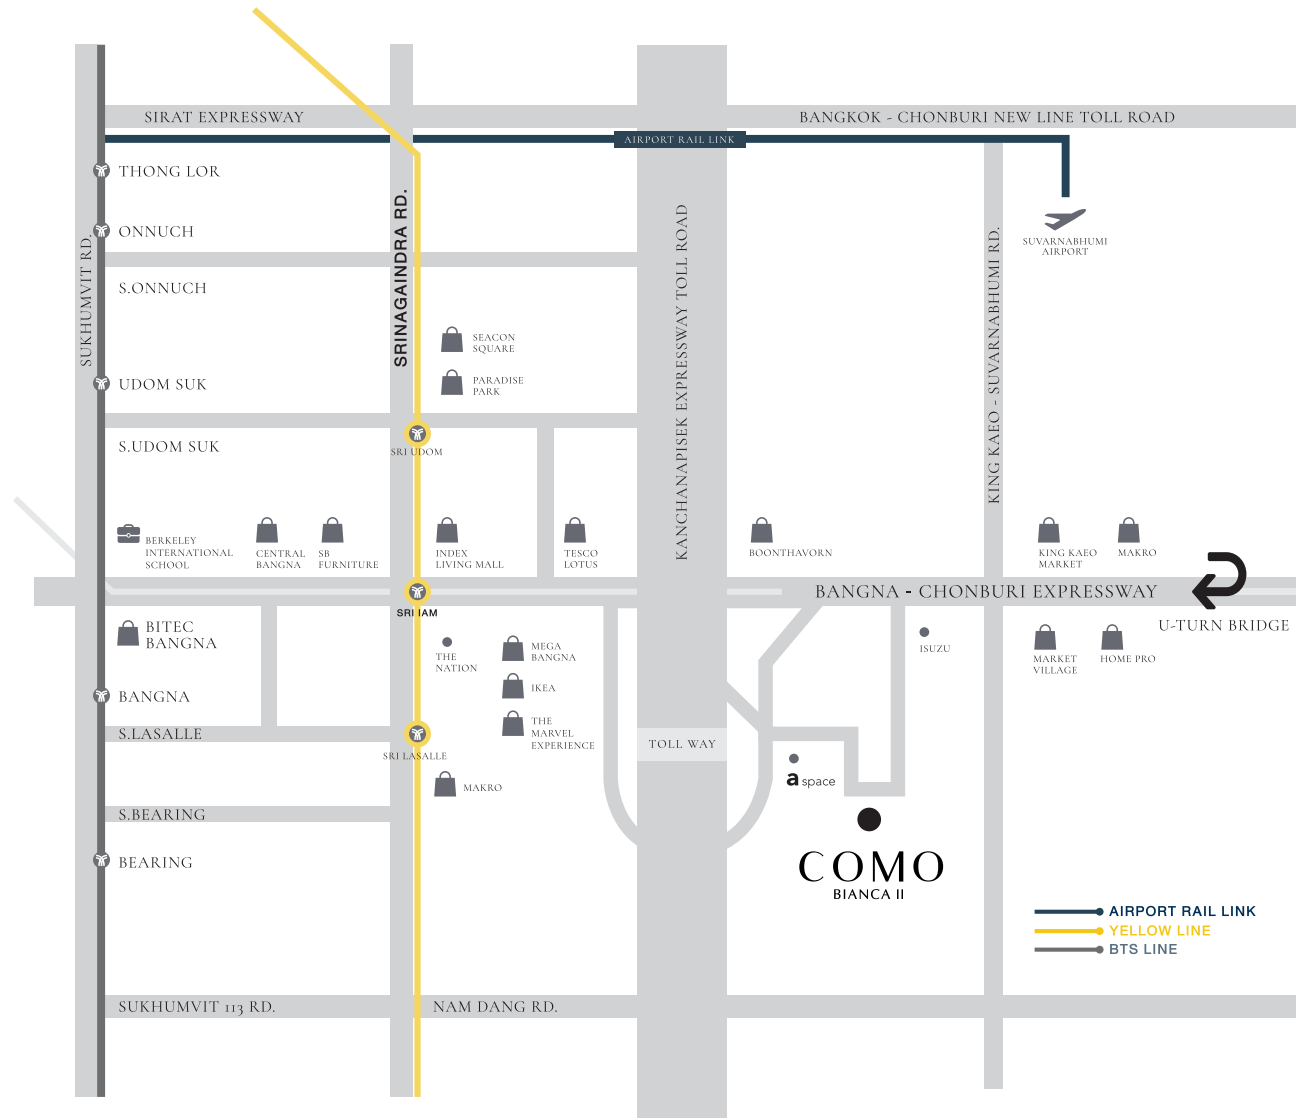

THE CANVAS OF MINIMAL
ECO LIVING LIFE

A woman with long dark hair, wearing a long-sleeved beige dress, is walking barefoot across a vast green field. She is holding the hand of a young girl with dark hair in a ponytail, wearing a white dress and white socks. They are walking towards the right side of the frame. The field is covered in green grass and small white daisies. The sky is bright and cloudy. The text "A PERFECT ECO-FRIENDLY FAMILY HOME" is centered in the upper half of the image.

A PERFECT ECO-FRIENDLY FAMILY HOME

NOTHING IS EVERYTHING...

the results of biology and psychology as well as many of the central facts of biology and anthropology," he adds.

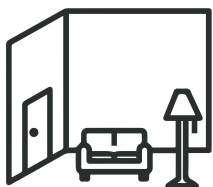

in particular the notion of reducing the age of the earth by a factor of nearly a million, and that of the time scale of geological events by an even larger factor. These views, which are in the most basic sense of the word, are not only in direct conflict with the evidence of the geological record, but they are also in direct conflict with the evidence of the physical sciences. For example, fundamental and well-established facts of physics, when taken together, show that the age of the earth is of the order of billions of years, and that the age of the solar system is of the order of billions of years. The evidence of the physical sciences thus provides the most reliable methods used to date the earth.¹³

Not only do I reject the scientific conclusions and the scientific method of scientific investigation as a committed Christian, but I also do not believe in the value of the scientific method. I believe that the scientific method is a method of intellectual inquiry that is based on the assumption that the universe is a machine, and that the laws of nature are the laws of the machine. I believe that the scientific method is a method of inquiry that is based on the assumption that the universe is a machine, and that the laws of nature are the laws of the machine. I believe that the scientific method is a method of inquiry that is based on the assumption that the universe is a machine, and that the laws of nature are the laws of the machine.
