# A GOOD TOWN IS A CONNECTED TOWN

In planning a great town, the focus is on walkability. This includes designing tree-lined streets with dedicated paths for pedestrians and cyclists. Additionally, a Park Connector to Gamuda Gardens aims to connect people with their community, nature and themselves.

Disclaimer: All drawings are subject to change as directed by the relevant authorities or the developer architect.

## Planting Trees

### GROWING FUTURES

At Gardens Park, more than 90,000 trees will be planted with native species. This includes 33,750 trees in Ring Park, creating lush and serene landscapes. The strategy includes establishing green corridors to connect various parts of the development, enhancing wildlife habitats and fostering a sustainable environment.

## LEADING THE PATH TO SUSTAINABILITY

At Gardens Park, we are committed to building a greener future through our 3R vision. By **reusing** topsoil for future tree planting, **recycling** on-site resources like timber, and **reducing** environmental impact on slopes and terrains, we pioneer sustainable practices that prioritize environmental preservation. Our dedication to eco-friendly solutions ensures a harmonious living environment that aligns with our 'Rewilding The Nature' vision.

More than  
**90,000**  
trees will be  
planted in  
Gardens Park.

## HONORING THE PAST NURTURING THE FUTURE WORKING WITH NATURE

We design our greenscapes with bioswales to effectively manage excess rainwater. These channels are seeded with native plants, which help filter contaminants from the water while providing essential habitats and food sources for birds and insects. By blending functionality with ecological harmony, we ensure a sustainable and thriving environment.
